

Multi-Bot Ultrasonic Sensor

Designed for **NXT 2.0** (8547)

Building Instructions

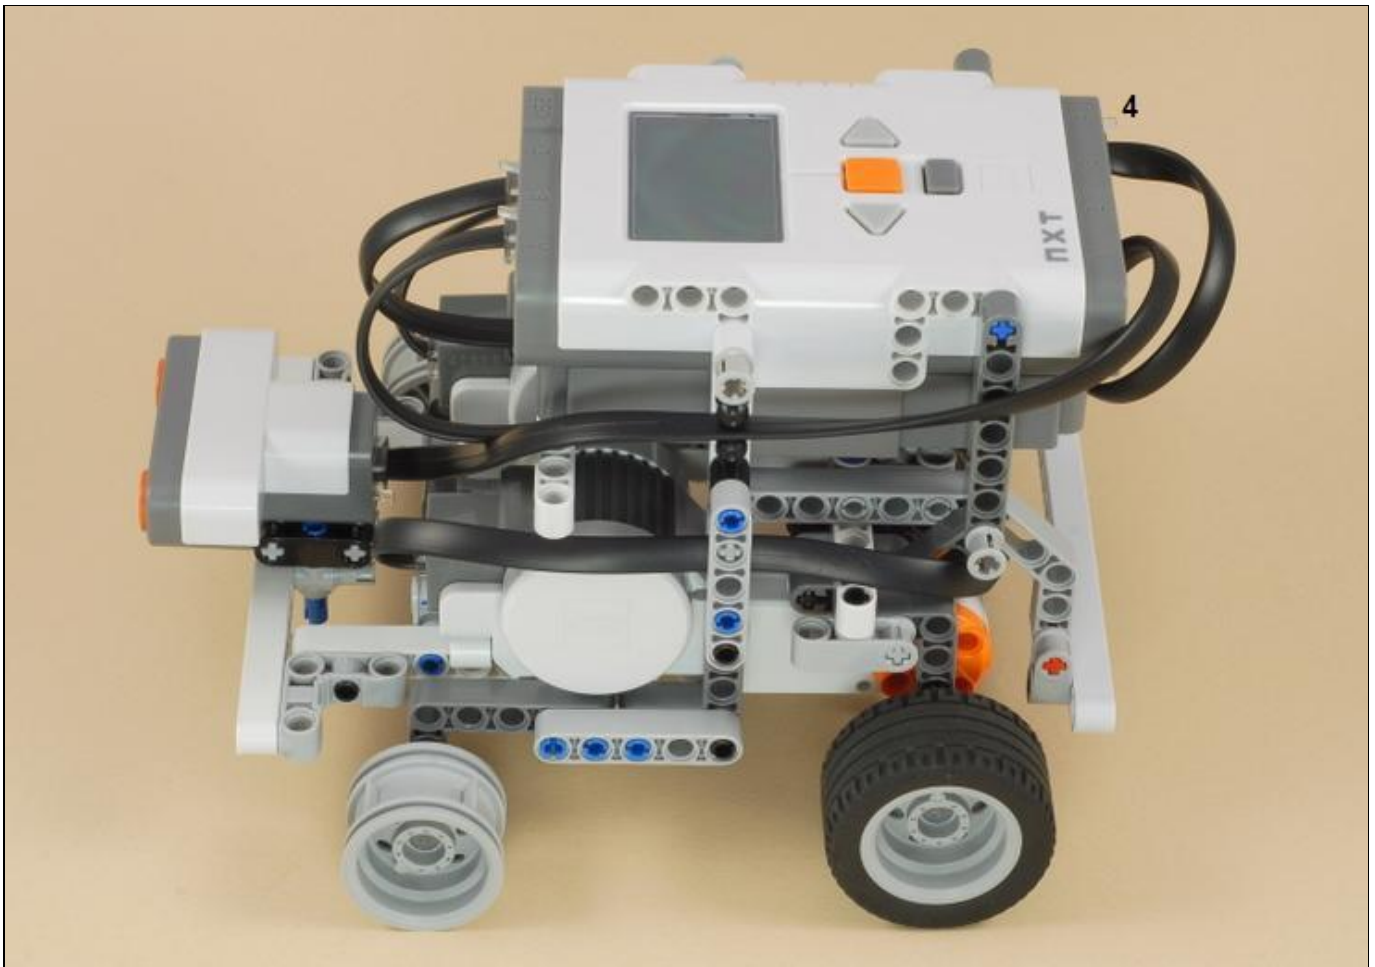

1

2

The Ultrasonic Sensor can be attached to the inside of the front attachment bar on Multi-Bot as shown below. Attach the wire to port 4 on the NXT. The wire can be pushed into one of the "wire clips" between the ball-end pegs on Multi-Bot's front upright to keep it out of the way.

Or, the Ultrasonic Sensor can also be attached to Multi-Bot's rear attachment bar as shown below.

Or, when the [Double Touch Sensor Bumper](#) attachment is attached to Multi-Bot, the Ultrasonic Sensor can be attached to the white cross beam on top of bumper attachment, as shown below.
